

**COLORED STONE REPORT**

May 1, 2025

IGI Report Number	698550322
Species	NATURAL TOURMALINE
Shape and Cutting Style	EMERALD MIXED CUT
Weight	5.93 CARATS
Measurements	19.11 x 6.30 x 5.45 mm
Color and Transparency	ORANGY PINK, TRANSPARENT
Characteristics	NATURAL INCLUSION(S) PATTERN

May 1, 2025

IGI Report Number	698550322
Species	NATURAL TOURMALINE
Shape and Cutting Style	EMERALD MIXED CUT
Weight	5.93 CARATS
Measurements	19.11 x 6.30 x 5.45 mm
Color and Transparency	ORANGY PINK, TRANSPARENT
Characteristics	NATURAL INCLUSION(S) PATTERN

**Species & Variety**

Gems may be classified in different species, according to their basic chemical composition and crystal structure; within a certain species, small differences in composition may result in different colors, or varieties.

The way that light interacts with the gem may create some astonishing optical phenomena, such as a star, a cat's eye effect or change of color, in different varieties.

**Transparency**

As light passes through a gemstone, part of it, if not all, will be absorbed, and part will be transmitted. The more light that is absorbed the less transparent the stone will be.

**Characteristics**

Internal characteristics are the inclusions of a gemstone. Not only do they provide essential information about the formation but also the conditions in which the gemstone is grown.

**Refractive Index**

When light passes through air and enters a gemstone it slows down due to a difference in the medium. The ratio between the speed of light in air and in a particular medium is known as the Refractive Index.

**Optic Character**

Determining how light travels through the crystal. Using a range of specialized instruments, we will be able to establish if the stone is isotropic or anisotropic, uniaxial or biaxial.

**Specific Gravity**

Specific gravity is the ratio of the density of the gemstone to the density of an equal volume of water.

All IGI Laboratories employ a wide range of state-of-the-art equipment, which provides comprehensive and accurate assessment of different gemstones.

OPTICAL and PHYSICAL PROPERTIES

Refractive Index	1.624 - 1.644
Birefringence	0.20
Optic Character	UNIAXIAL
Optic Sign	-
Specific Gravity	3.06

*Optical and physical properties are approximate values*

Photography is approximate
